CHEVROLET

1996

C/K PICKUP

The 1996 C/K Pickups are available in two trim levels: the "Cheyenne" (standard) and the "Silverado" (uplevel).

Changes on the C/K Pickup for 1996 include:

A new lineup of gasoline engines including the Vortec 4300, 5000, 5700 and 7400 engines. While driving down the road, your customers will experience the benefits of these new engines in the following areas:

- Increased Performance—These engines produce *up to 30% more horsepower and 10% more torque* over an extended operating range compared to last year's engines. Some of the internal changes that make this possible include:
  - Sequential fuel injection for a more precise air/fuel mixture
  - High-flow cylinder heads for improved air intake and exhaust flow
  - Higher compression ratio
  - New camshaft and roller lifters

  An example of the increased power of these engines is the Vortec 5000 V8 engine. For 1996, this new engine is rated at 220 horsepower. Not only is this 45 horsepower greater than the old 5.0L V8 it replaces but it is also 20 more horsepower than last year's 5.7L V8 engine
- *Increased Pleasability—These engines start* quicker, accelerate faster, provide heat faster, idle smoother and run quieter. Some of the design changes that make this possible include:
  - Composite front cover, remote air cleaner and intake manifold for reduced noise
  - Stiffer accessory drive and powertrain for reduced noise and vibration
  - Sequential fuel injection for smoother idle and quick starts
  - Controlled by-pass thermostat for quicker available interior heat
  - Increased low-end torque to get loads moving faster
  - Redesigned engine mounts and brackets for reduced vibration
- Reduced Maintenance—Service intervals have been extended for changing spark plugs, replacing engine coolant and checking ignition timing, accessory drive belts and the PCV valve. Some of the factors involved in this are:
  - Platinum-tip spark plugs for extended wear
  - Crankshaft and camshaft sensors
  - Improved seals
  - Extended-life engine coolant (DEX-COOL™)
  - Aluminized stainless steel exhaust system for extended wear
- Increased Emissions Compliance—On Board Diagnostics II (OBD II) provides early detection and diagnosis of potential problems. This is possible due to:
  - Air temperature sensors at the crankshaft, camshaft and manifolds
  - Sequential fuel injection to help reduce exhaust emissions
  - Vehicle Control Module for earlier detection and diagnosis of potential problems
  - Improved combustion chamber to reduce emissions

C/K PICKUP

Changes on the C/K Pickup for 1996 (continued)

- Optional Electric Shift Transfer Case (NP1) 1500/2500 Series only
- Optional Rear-Seat Easy Access System on C/K 10753 Extended-Cabs (E24—Interim Availability)
- New Front Bench Seat Armrest Stowage Compartment with bench seats on uplevel trim YE9 Silverado. Includes a coin holder, a map net and a writing board
- Optional Electrochromic Interior Rearview Mirror with 8-point compass (DD7)
- Revised 5-speed Manual Transmission (M50); includes reduced first gear ratio—3.49:1
- 4-speed 4L60-E Automatic Transmission enhancements (M30)
- 4-speed 4L80-E Automatic Transmission enhancements (MT1)
- New P-Metric Tires now available on K1500 models
- Two Auxiliary Power Outlets with spring-loaded doors
- Standard Daytime Running Lamps
- Standard Illuminated Entry
- Standard DEX-COOL™ Extended-Life Engine Coolant. Coolant color is fluorescent orange and the change interval is now 5 years/100,000 miles
- Rear-Seat Heat Ducts on Crew-Cab models
- One new Interior Color
- One new Exterior Color
- New Underhood Storage Compartment

MODEL SELECTION SUMMARY

Use the chart below to choose the model that fits your customer's needs. Please note that the Base Payloads shown reflect the maximum allowable weight of cargo that can be carried in a standard model, including occupants. (They are calculated by subtracting curb weight from the GVWR.) To calculate payloads for models with optional equipment, please refer to the WEIGHTS section in the back of this book or consult your 1996 GM PROSPEC. Also, the Maximum Trailer Weights shown below are based on vehicles that are properly equipped. See your Chevrolet Truck Order Guide for specific details.

Note: Axle ratio availability depends on model, powertrain and emissions selected.

TRIM LEVELS

Chevrolet offers C/K Pickups in two primary trim levels — "Cheyenne" and "Silverado." The following chart details major standard features. See your 1996 Chevrolet Truck Order Guide for details.

CHASSIS EQUIPMENT			
KEY: ■ = STANDARD, — = NOT INCLUDED		CHEYENNE (STANDARD)	SILVERADO (YE9)
BRAKES	Power-assisted, front disc, rear drum; self-adjusting. Four-wheel anti-lock system. Includes brake/transmission interlock.	■	■
EXHAUST	Single. Aluminized stainless steel.	■	■
FRAME	All-welded ladder-type, channel design and boxed front-end section. Section modulus (cu in.): Reg.-Cabs — 2.66 on C/K 1500 and C/K 2500 (2WD); 3.27 on C/K 1500 and C/K 2500 (4WD). 5.26 on C/K 2500 /C6P and C/K3500 (2WD); 5.25 on C/K2500 w/C6P and C/K3500 (4WD). Ext.-Cabs — 3.37 on C/K1500 and C/K2500 (2WD); 4.06 on C/K 1500 and C/K2500 (4WD); 6.06 on C/K 2500 w/C6P and C/K3500. Crew-Cab — 7.49 on all models.	■	■
FUEL TANK	25.0 gallon (approx.) capacity on C/K 10703/53 and C/K 20753 models. 34.0 gallon (approx.) capacity on all other models.	■ ■	■ ■
REAR AXLE	Hypoid semi-floating on C/K 1500 and 2500. Full-floating on C/K 2500/C6P w/L65 and C/K3500.	■	■
SHOCK ABSORBERS	25mm: C/K 1500 front and rear; 32mm: Front and rear on C/K2500 at 7200 lb GVWR and C/K3500; Rear on C/K2500 and 3500; 35mm: Front on C/K2500 at 8600 lb GVWR C/K 3500 and Crew-Cab.	■	■
STABILIZER BAR	4x2: Front 1.25 inch; 4x4: Front 1.18 inch.	■	■
STEERING	Integral power.	■	■
SUSPENSION, FRONT	4x2: Independent with computer-selected coil springs. 4x4: Independent with computer-selected torsion springs.	■ ■	■ ■
SUSPENSION, REAR	C/K1500 and 2500: Semi-elliptic two-stage multileaf springs. C/K3500: Semi-elliptic two-stage multileaf springs main/auxiliary.	■ ■	■ ■
TOW HOOKS	Two front on 4x4s.	■	■

WINDSHIELD WIPERS	Intermittent.	■	■

PREFERRED EQUIPMENT GROUPS

Preferred Equipment Groups (PEGs) are convenient option packages that can save your customers money. They would pay appreciably more by buying all the options in a Preferred Equipment Group as individual options. (Savings based on a comparison of Manufacturer's Suggested Retail Price of option packages vs. MSRP of individual options purchased separately.)See your 1996 Chevrolet Truck Order Guide and Vehicle Price Schedule for specific information.

OPTIONS

These options can be ordered individually in addition to the Preferred Equipment Groups if not already included. See your 1996 Chevrolet Truck Order Guide for availability and restrictions. The Option Code is listed in **bold type.**

- *Air Cleaner, High Capacity (N/A with diesel engine)* **K47**
- *Air Conditioning* **C60**
- *Appearance Package: Chrome Grille, Composite Headlamps and Dual Horns* **V22**
- *Axles, Rear:*
  - *3.08* **GU4**
  - *3.42* **GU6**
  - *3.73* **GT4**

C/K CHASSIS-CAB

The C/K 3500 Chassis-Cab is available in two trim levels: the "Cheyenne" (standard) and the "Silverado" (uplevel).

Changes on the C/K Chassis-Cab for 1996 include:

- New Front Bench Seat Armrest Stowage Compartment with bench seats on uplevel trim YE9 Silverado. Includes a coin holder, a map net and a writing board
- Vortec 5700 V8 engine (L31). Replaces 5.7L (L05) and includes sequential fuel injection, higher horsepower and torque ratings and spark plugs with 100,000-mile expected life
- Vortec 7400 V8 Engine (L29). Replaces 7.4L (L19) and includes sequential fuel injection, higher horsepower and torque ratings and spark plugs with 100,000-mile expected life
- Standard On Board Diagnostics (OBD II)
- 4-speed 4L80-E Automatic Transmission Enhancements (MT1)
- 40 gallon fuel capacity on C/K 31003, 31403 and C31803 models with new standard Dual Fuel Tank design. 40 gallon capacity combines existing 22 gallon side fuel tank with new 18 gallon rear fuel tank. If desired, optional Rear Fuel Tank Delete (NQZ) is also available
- Two Auxiliary Power Outlets with spring-loaded doors
- Standard Daytime Running Lamps
- Standard Illuminated Entry
- Standard DEX-COOL™ Extended-Life Engine Coolant. Coolant color is fluorescent orange and the change interval is now 5 years/100,000 miles
- Rear Seat Heat Ducts on Crew-Cab models
- One new Interior Color
- One new Exterior Color (available on all models except C31003, 31403 and 31803 at 15,000 lb GVW)
- New Underhood Storage Compartment

MODEL SELECTION SUMMARY

Use the chart below to choose the model that fits your customer's needs. Please note that the Base Payloads shown reflect the maximum allowable weight of cargo that can be carried in a standard model, including occupants. (They are calculated by subtracting curb weight from the GVWR.) To calculate payloads for models with optional equipment, please refer to the WEIGHTS section in the back of this book or consult your 1996 GM PROSPEC. Also, the Maximum Trailer Weights shown below are based on vehicles that are properly equipped. See your Chevrolet Truck Order Guide for specific details.

TRIM LEVELS

Chevrolet offers all Chassis-Cabs in two trim levels, "Cheyenne" and "Silverado." The following chart details major standard features. See your 1996 Chevrolet Truck Order Guide for more details.

CHASSIS EQUIPMENT			
KEY: ■ = STANDARD, — = NOT INCLUDED		CHEYENNE (STANDARD)	SILVERADO (YE9)
BRAKES	Power-assisted, front disc, rear drum; self-adjusting. Four-wheel anti-lock system. Includes Brake/Transmission Interlock.	■	■
EXHAUST	Single. Aluminized stainless steel.	■	■
FRAME	All-welded ladder-type, channel design and boxed front-end section. Section modulus (cu in.): C/K20903 - 30903: 2WD-5.26 cu in.; 4WD-5.25 cu in. C/K31003 - 31403: 2WD-6.47 cu in.; 4WD-6.76 cu in. 3500HD: 31003, 31403-8.42, 31803- 9.75 cu in. Crew-Cab: 7.49 cu in.	■	■
FUEL TANK	34.0 gallon (approx.) capacity on C/K 20903, 30903 and Crew-Cab models. 40.0 gallon (approx.) capacity on C/K 31003, 31403 and 3500 HD. (Dual tank design, including 22 gallon side fuel tank and 18 gallon rear fuel tank.)	■ ■	■ ■
REAR AXLE	Full-floating on C/K 3500 models. Semi-floating on C/K 20903.	■	■

CHASSIS EQUIPMENT (CONT.)			
KEY: ■ = Standard, — = Not Included		CHEYENNE (STANDARD)	SILVERADO (YE9)
SHOCK ABSORBERS	Front: 35 mm; Rear: 32 mm (35 mm on C3500 HD).	■	■
STABILIZER BAR	4x2: Front 1.25 inch. 4x4: Front 1.18 inch.	■	■
STEERING	Integral Power.	■	■
SUSPENSION, FRONT	4x2: Independent with computer-selected coil springs (I-beam/leaf springs on C3500 HD). 4x4: Independent with computer-selected torsion bars.	■ ■	■ ■
SUSPENSION, REAR	Semi-elliptic two-stage multileaf springs on C/K 20903 models. Semi-elliptic two-stage multileaf springs main/auxiliary on C/K 3500 models. (No auxiliary on C3500 HD).	 ■	 ■
TOW HOOKS	Two front on 4x4s.	■	■
EXTERIOR EQUIPMENT			
FRONT BUMPER	Bright appearance. Bright appearance w/black rub strip and bright trim.	■ —	— ■
GLASS	Solar-Ray® tinted glass.	■	■
GRILLE	Molded plastic painted argent with argent air intake areas. *Deluxe front appearance package with bright grille and bright trim with* argent air intake areas.	■ —	— ■
HEADLAMPS	Single rectangular halogen. Composite halogen.	■ —	— ■
HORN	Single electric low-note. Dual low- and high-note (standard C3500 HD).	■ —	— ■
INSULATION	Hood and cab-to-fender.	—	■
LAMPS	Center high-mounted stop lamp/cargo lamp (N/A on 3500HD). Five amber roof marker lamps on dual rear wheel models only. Underhood, reel type, fixed.	■ —	■ ■
MIRRORS	RH and LH below-eye-line type, painted black. Head size 8.5" x 5.0." RH and LH electric below-eye-line type, painted black. Head size 8.5" x 5.0" (Models over 10,000 lb GVWR use 9.0" x 6.5" mirrors.)	■ —	— ■
RUNNING LAMPS	Daytime.	■	■
SPARE TIRE AND WHEEL	Full-size (20903 and 30903 models only).	■	■
SPARE TIRE CARRIER	Winch-type carrier mounted under frame at rear (20903 and 30903 models only).	■	■
STORAGE COMPARTMENT	Additional underhood storage compartment. (Except when turbo diesel engine or TP2 auxiliary battery is ordered.)	■	■
TIRES	Four on single-rear-wheel models and six on dual-rear-wheel models. C/K 20903, C/K 30903 and C/K 30943 w/R04: LT245/75R16E. C/K 3500 w/R05: LT225/75R16 C/D. 3500 HD: 225/70R 19.5F (See Order Guide for details).	■	■
WHEELS	Silver painted steel wheels with black hub ornament. C/K 20903, C/K 30903 and C/K 30943 w/R04: 16.0" x 6.5". C/K 3500 w/R05: 16.0" x 6.0". 3500 HD: 19.5" x 6.0". Rally wheel trim. Crew-Cab: Rally trim.	■ — —	— ■ ■
WHEEL OPENING FLARES	Front. (K2500 only)	■	■
WIRING	7-lead wiring harness for trailering purposes (20903 and 30903 models only).	■	■
INTERIOR EQUIPMENT			
AIR CONDITIONING	Front.	—	■
ARMRESTS	RH and LH padded integral with door panels.	■	■
ASSIST HANDLES	Passenger side.	■	■
CAB BACK PANELS	Color-keyed carpet.	—	■
CIGARETTE LIGHTER	Located on instrument panel. Includes ashtray light and two covered auxiliary power outlets.	■	■
CUPHOLDERS	Two located in dash.	■	■
DOME LAMP	Switch in LH and RH door jamb (two lamps with front door-actuated switches on Crew-Cab). Dome lamp includes illuminated entry feature. Crew-Cab includes switches in all doors.	■ —	■ ■

C/K CHASSIS-CAB

TOOLS	Mechanical jack and wheel wrench located behind front seat or on rear compartment floor (N/A 3500HD).	■	■
WINDSHIELD WIPERS	Intermittent.	■	■

PREFERRED EQUIPMENT GROUPS

Preferred Equipment Groups (PEGs) are convenient option packages that can save your customers money. They would pay appreciably more by buying all the options in a Preferred Equipment Group as individual options. (Savings based on a comparison of Manufacturer's Suggested Retail Price of option packages versus MSRP of individual options purchased separately.) See your 1996 Chevrolet Truck Order Guide and Vehicle Price Schedule for specific information and price.

OPTIONS

These options can be ordered individually in addition to the Preferred Equipment Groups if not already included. See your 1996 Chevrolet Truck Order Guide for specific availability and restrictions. The Option Code is listed in **bold type.**

- *Air Cleaner, High Capacity (N/A Diesel Engine)* **K47**
- *Air Conditioning* **C60**
- *Appearance Package (Includes Chrome Grille, Composite Halogen Headlamps and Dual Horns)* **V22**

1996 GENERAL MOTORS TRUCKS

Consumer Information

Truck – Camper Loading

CONSUMER INFORMATION REGULATION 575.103 issued by the National Highway Traffic Safety Administration requires manufacturers of trucks capable of accommodating slide–in camper bodies to provide information concerning proper load and proper load distribution in truck–camper applications.

This Consumer Information booklet is designed to provide basic information relating to load capabilities of 1996 General Motors truck models which are adaptable to slide–in camper applications. Information contained herein is applicable to the truck buyer who already owns a 1996 General Motors truck or to a prospective truck purchaser.

The regulation also provides that proper truck–camper loading information is to be maintained in truck dealerships and be made available to all prospects on request. This booklet relates to the 1996 General Motors truck models recommended for slide–in camper applications and is to be used as a consumer information brochure.

Product specifications or data contained herein may change periodically. When a revision of this booklet is supplied to truck dealers, it is the dealers' responsibility to make the revised information available to the public.

Chevrolet's and GMC's 1988 and newer Full–Size C/K Pickups feature a styling that is more aerodynamic than prior models. Aftermarket manufacturers offer many products, such as slide–in campers, camper shells, and bedliners, designed to fit on the new pickups. However, some products designed for use on Chevrolet Full–Size Pickups, built prior to the 1988 model year or R–V models through the 1991 model year, may not fit in the bed of this vehicle. Please confirm the compatibility of any aftermarket product you intend to install on your new truck by consulting the product manufacturer.

Chevrolet's and GMC's 1994–1996 S/T Series Pickups feature new styling that is more aerodynamic than models from previous years. Some aftermarket items designed for 1993 and earlier S/T Series Pickups may not fit in the bed of this new vehicle. Please consult the product manufacturer for compatability prior to purchase.

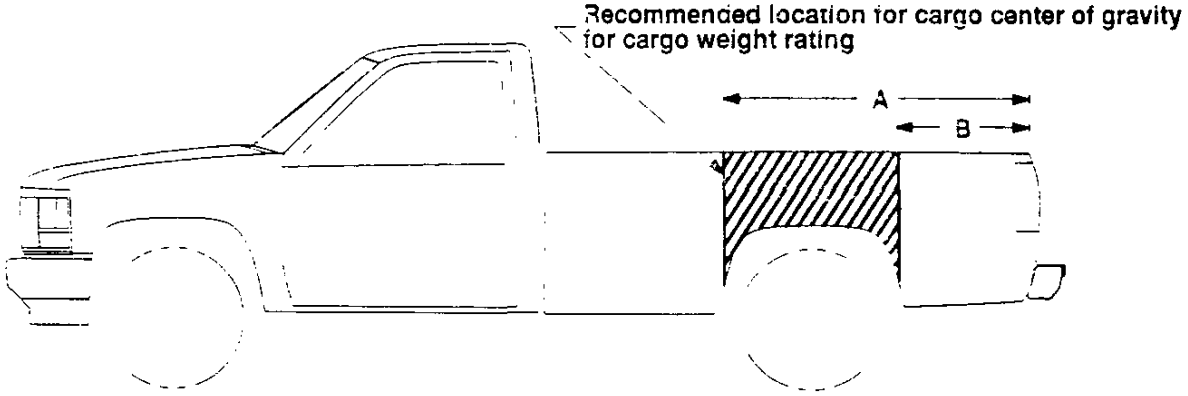

All illustrations and specifications contained in this literature are based on the latest product information available at the time of publication approval. The right is reserved to make changes at any time in prices, colors, materials, equipment, specifications and models, and also to discontinue models.

TRUCK–CAMPER LOADING

Consumer Information Regulation 575.103 requires manufacturers of trucks capable of accommodating slide–in campers to specify the vehicles' Cargo Weight Rating (CWR) and the longitudinal limits within which the center of gravity for the cargo weight rating should be located.

Cargo Weight Rating (CWR)–The cargo weight rating of a vehicle means the value specified by the vehicle manufacturer as the cargo–carrying capacity of a vehicle in pounds, exclusive of (minus) the weight of occupants, computed as 150 pounds times the number of designated seating positions.

Longitudinal Center of Gravity (CG) Zone for CWR–The forward limit of the recommended CG Zone is determined by the application of dimension "A" measured in inches from the rear of the truck bed. The rearward limit of the recommended CG Zone is established by application of dimensions "B", also measured in inches from the rear of the truck bed. The recommended CG Zone lies between these points.

Model _____ **Calculated Cargo Weight Rating** _____

Dimension A _____ **Dimension B** _____

Limitations on Recommended CG Zones

FORWARD LIMIT

(1) Must not extend beyond the inside surface of the pickup box.

(2) Must not exceed the front gross axle weight rating (GAWR).

REARWARD LIMIT

(1) Must be no farther rearward than the inside surface of the pickup box.

(2) Must not exceed the gross axle weight rating (GAWR) of the rear axle.

(3) Must not exceed rear axle load limits below:

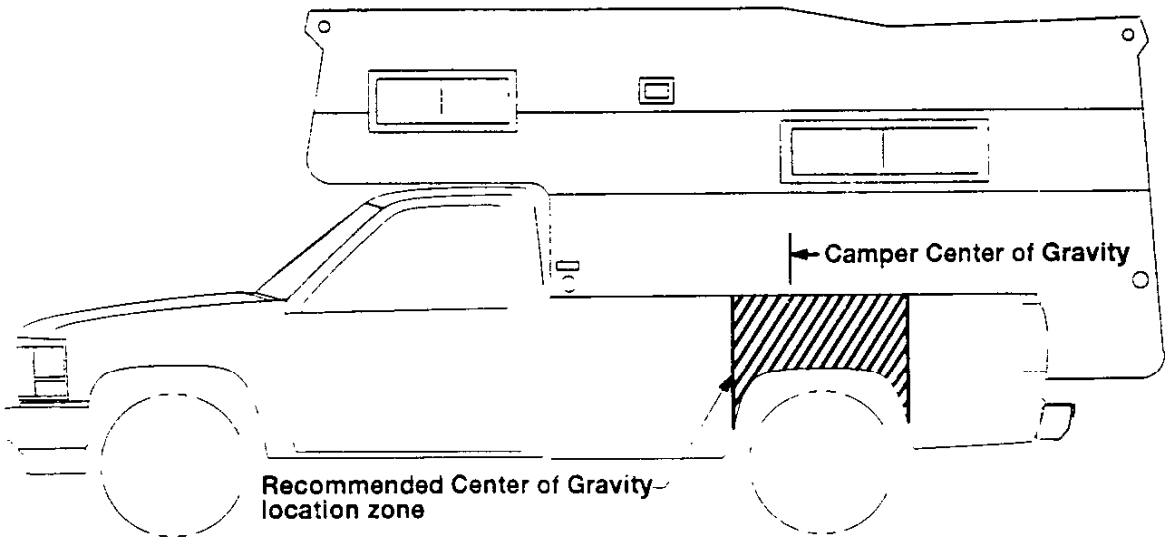

Series		Rear Axle Load Limits (% of GVWR)
S/T 10/Sonoma	2WD 4600 lb. GVWR 2WD 4900 lb. GVWR 4WD 5150 lb. GVWR	63% 59% 57%
C/K 1500		60%
C/K 2500		65%
C/K 2500/C6P, C/K 3500		70%

Vehicle CG Identification–All General Motors Corporation trucks that may be suitable for carrying a slide–in camper incorporate a Truck–Camper Loading information label located on the glove box floor on C/K and S/T 10/ Sonoma models. The vehicle identification number (VIN), the as–manufactured cargo weight rating (CWR) of that vehicle plus the CG limits of dimension "A" and "B" for that vehicle in inches are included.

Vehicle and Truck–Camper Loading are also discussed at length in the Vehicle Owner's Manual.

TRUCK–CAMPER LOADING

Loading Instructions–When the truck is used to carry a slide–in camper, the total cargo load of the truck consists of the manufacturer's camper weight figure, the weight of installed additional camper equipment not included in the camper manufacturer's weight figure, the weight of camper cargo and the weight of passengers *in the camper.* The total cargo load should not exceed the truck's cargo weight rating (CWR) and the camper's center of gravity should fall within the truck's recommended center of gravity zone when installed.

Any accessories or other equipment added to this vehicle, after final date of manufacture, must be weighed or have their weight determined, and the weight deducted from the prescribed cargo weight rating (CWR) of this vehicle. This may decrease the permissible longitudinal zone of the center of gravity for this vehicle.

The longitudinal center of gravity zone has been determined for the full cargo weight rating of this truck. If a slide–in camper has a total weight less than the cargo weight rating (CWR), the permissible longitudinal zone of the center of gravity may be larger. However, individual axle loads should not exceed either of the gross axle weight ratings (GAWR).

Secure loose items to prevent weight shifts that could affect the balance of your vehicle. When the truck camper is loaded, drive to a scale and weigh on the front and on the rear separately to determine the axle loads. Individual axle loads should not exceed either of the gross axle weight ratings (GAWR). The total of the axle loads should not exceed the gross vehicle weight rating (GVWR). These ratings are given on the vehicle identification plate and on the vehicle certification label which are located on the left side of the vehicle, normally on the door latch post or door edge next to the driver. If weight ratings are exceeded, move or remove items to bring all weights below the ratings.

CAUTION: The longitudinal center of gravity is only one of the many factors which may affect the overall performance of a vehicle, including handling, steering and braking. The cargo load should be distributed on both sides of the centerline as equally as possible. The recommended logitudinal limits for the camper's center of gravity are based on the assumption that the vehicle will be operated with reasonable prudence in light of all of the existing conditions. Failure to do so could result in unsatisfactory vehicle performance and could make the vehicle unsafe to operate.

In this connection, refer to any recommendations by the slide–in camper manufacturer regarding installation and loading of the camper.

TRUCK–CAMPER LOADING
DEFINITION OF TERMS

For the purposes of calculating Truck–Camper Loading in this book, listed below are some common terms and abbreviations:

Cargo Weight Rating (CWR)– means the value specified by the vehicle manufacturer as the cargo–carrying capacity of a vehicle in pounds, exclusive of (minus) the weight of occupants, computed as 150 pounds times the number of designated seating positions.

Center of Gravity (CG)–point where the mass of a body is concentrated and if suspended at that point would balance front and rear.

Curb Weight–weight of a vehicle without driver, passengers or cargo but including maximum capacity of fuel, oil, coolant and other items of standard equipment.

Dimension A & B–front and rear limit of Center of Gravity (CG) zone.

Gross Vehicle Weight Rating or 'GVWR' means the value specified by the manufacturer as the loaded weight of a single vehicle.

Gross Axle Weight Rating or 'GAWR' means the value specified by the vehicle manufacturer as the load carrying capacity of a single axle system measured at the tire–ground interfaces.

Model Weight–weight of the vehicle with all items of standard equipment, 150 pounds per passenger in each designated seating position and maximum capacity of fuel, oil and coolant.

Payload Rating is the maximum allowable load (including the weight of the driver and all occupants) that the vehicle can carry based on all factory–installed equipment on the vehicle.

RPO–Regular Production Option.

Slide–In Camper–means a camper having a roof, floor, and sides, designed to be mounted on and removable from the cargo area of a truck by the user.

Weight Distribution–the amount of a vehicle's weight that rests on each axle.

Wheelbase (WB)–the distance from the centerline of the front axle to the centerline of the rear axle.

LIMITATIONS

The following General Motors truck models are <u>not</u> recommended for slide–in camper applications:

- Any pickup model with a cargo weight rating (CWR) of less than 500 lbs. A statement to this effect is imprinted on the Truck–Camper Loading information label which states whether that vehicle is recommended for use with a slide–in camper.
- S 10/Sonoma (2WD) Pickup with 4200 lb. GVWR.
- T 10/Sonoma (4x4) Pickup.
- S/T 10/Sonoma Pickup with 108.3" WB.
- S/T 10/Sonoma Extended Cab Pickup.

Note: C/K 1500 Pickups should not be used for larger, cab–over type slide–in campers.

INSTRUCTIONS FOR PROSPECTIVE TRUCK PURCHASERS VEHICLE SELECTION AND WEIGHT ANALYSIS

1. For S 10/Sonoma Models.
   You must order S 10803 (117.9" WB) model with one of the following GVWR Ratings:

S 10803 (2WD)	4600 lb. GVWR	Option C5D
S 10803 (2WD)	4900 lb. GVWR	Option C5A

   If you intend to use a slide–in camper on your S 10/Sonoma Pickup. Record the model on page 3. Record the model GVWR, front GAWR, and rear GAWR on page 7. These ratings can be found in the S 10/Sonoma section of the General Motors Light–Duty Truck Data Book or Chevrolet Light–Duty Technical Guide on the Specifications pages. This information is also available in the Chevrolet Spec Manager computer program.

   For C/K Models
   From the model selection pages of the C/K pickup section of the GMC Light–Duty Truck Data Book, Chevrolet Light–Duty Technical Guide or the Chevrolet Spec Manager System, select the pickup model you desire. Record this information on page 3. Refer to the Specification section for the selected model. Select the GVWR you require and note any minimum tire size and chassis equipment requirements for that GVWR. (To approximate the GVWR you require, add your loaded camper weight to the vehicle curb weight plus the occupants weight at 150 lbs. per designated seating position.) Record the GVWR and the Gross Axle Weight Rating (GAWR), Front and Rear (from the Specifications section), on line 1 of the camper loading worksheet, page 7.
2. Record the front and rear curb weights of your selected vehicle on line 2, page 7.
3. Record the front and rear passenger weights on line 3, page 7.
4. List all factory–installed options you desire, including any options required by your selected GVWR, with their front and rear weights on the Pickup camper loading worksheet on page 7.
5. Total the front and rear weights of vehicle model and options to arrive at the total front and rear weight of the vehicle. Follow the directions on page 7, lines 5 through 5C to arrive at the adjusted total vehicle weight.
6. Subtract the adjusted total vehicle weight from the GVWR to arrive at the cargo weight rating (CWR) of your truck.* Record this information on page 3.
7. Proceed to page 11 and calculate the center of gravity location limits using front and rear GAWRs, cargo weight rating (CWR), and front and rear weight of truck as determined above. Record this information on page 3.

*The addition of any dealer–installed or other accessories will reduce the cargo–carrying capacity by the weight of the equipment installed.

TRUCK–CAMPER LOADING

CALCULATIONS TO DETERMINE FORWARD (A) AND REARWARD (B) LOCATION OF CENTER OF GRAVITY FOR CARGO WEIGHT RATING

Calculations for Dimension A

$$A = \left\{ \frac{\text{Front GAWR} - 1.05 \times \text{Front Weight* of Truck}}{\text{Cargo Weight Rating}} \right\} \times WB + C$$

Enter Front GAWR		_____
Subtract Front Weight* of Truck x 1.05	–	(_____)
Answer		_____
Divide Answer by Cargo Weight Rating (CWR)	÷	_____
Answer		_____
Multiply Answer by Wheelbase (See Chart on page 10)	X	_____
Answer		_____
Add C Dimension to Answer (See Chart on page 10)	+C	_____
Dimension A	=	_____

Note: If "A" is greater than pickup box length, use box length for "A" dimension.

Calculations for Dimension B

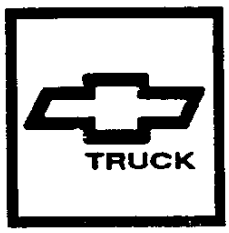

$$B = \left\{ 1 - \frac{\text{Rear GAWR} - 1.1 \times \text{Rear Weight* of Truck}}{\text{Cargo Weight Rating}} \right\} \times WB + C$$

Enter Rear GAWR		_____
Subtract Rear Weight* of Truck x 1.1	–	_____
Answer		_____
Divide Answer by Cargo Weight Rating (CWR)	÷	_____
Answer		_____
Subtract Answer from 1.000	–	(_____)
Multiply Answer by Wheelbase (See Chart on page 10)	X	_____
Answer		_____
Add C Dimension to Answer (See Chart on page 10)	+C	_____
Dimension B	=	_____

Note: If "B" dimension is negative, use 0 (zero) for "B" dimension.
If "B" dimension is greater than "A" dimension, camper usage is not recommended at the Calculated Cargo Weight Rating. Camper usage may be possible for a lighter camper. Substitute known specific camper weight (less than Cargo Weight Rating) for Cargo Weight Rating in calculations above to determine "A" to "B" range for that specific camper.

Record dimension A and B on page 3.

* From page 7 line 4a.
